

UF200VGW

Display Freezer

Product Features

- Heated glass door
- Electronic thermostat
- Automatic defrost
- Adjustable shelves
- Adjustable feet with rollers to rear
- LED interior light
- Ventilated cooling
- Lock

Ventilated display freezer

The UF display freezer is a favorite among our customers and with good reason. The effective ventilated cooling system allows for adjustable shelves, so you can easily organize the freezer according to your present product range, while the heated glass door prevents condensation and ensures your products are clearly visible. In addition, the cabinet offers features such as LED interior lighting, automatic defrost, and a digital temperature controller. Whether showcasing ice cream or frozen meals, this freezer offers great product presentation at a competitive price. The TEFCOLD UF range includes both display freezers and storage freezers in several sizes, and we offer matching coolers as well (see UR range).
