- Panel construction, flatpack
- Skinplate exterior/interior
- Reinforced base plate
- Adjustable legs (from inside the cabinet)

High-end cold room for KEGs

When it comes to keeping your kegs cold and easily accessible, the SKB from Serrco delivers smart solutions without compromise. The SKB keg cooler is built from panels like a cold room and is delivered as flatpack, making it ideal for installment in tight spaces such as cellars.

The SKB keg cooler is designed for storing 20L, 30L, and 50L kegs or crates. Efficiency is built into every detail, and the reinforced base plate and large, easy-access doors make loading and unloading kegs hassle-free.

The machine unit is sold separately and is plug-in ready. For this cabinet, we recommend that you combine it with the SKB-MU 50 R as this has a larger capacity than the SKB-MU for top installation. Both options offer a low-energy ventilated cooling system with an electronic thermostat and automatic defrost to keep your operations running smoothly.

Measures and Content

20 l KEG	pcs	24
50 l KEG	pcs	8
Gross / Net Weight	kg	186.5 / 163.5
Gross Volume	l	1566
Net Volume	l	1539
