Easy access storage compartment

This high-quality serve over counter brings style and functionality to any shop selling fresh fish. With its sleek design featuring anti-mist glass and LED lighting in the top, this display case makes an attractive focal point. But it's more than just good looks. The 50 mm deep tray is designed specifically for safely storing fresh fish on ice. Be aware that the condensation must be led directly to a drain.

The serve over display is easy to clean with its stainless steel interior and front glass that lifts upwards and stays in place. The unit comes with an easily accessible storage compartment with wide doors that accommodate standard E2 boxes. The SOC range can be multiplexed to create a complete counter solution. Each unit has two 220-240V sockets so you can connect e.g. a cash register.

It is also possible to make factory orders for SOC serve over counters for different purposes and temperature ranges. Please contact our sales team for more information.
