TD50C

Minibar Drawer

Product Features
- Compressor operated cooling system
- Low energy consumption
- Low noise operation
- Great product presentation
- LED interior light
- No front/handle - ready to be build in
- SLEEP-mode function for silence period

Minibar drawer for integration into existing décor

The TD minibar drawer is a great choice for hotel rooms. It has a low energy consumption, which helps keep running costs down. The minibar cooler has an efficient and low-noise compressor operated cooling system. The compressor operated cooling system is a must for warmer surroundings, as they secure a lower temperature level as well as a shorter pull-down time compared to absorption operated minibars.

The drawer design gives a great overview of the content, so guests can quickly find the snacks or cold beverages, they are looking for. It even has a small pull-out drawer within, for e.g. small chocolates and bottles.

The TD50C has no front/handle, as it is made specifically for full integration into the existing décor. Fit the minibar drawer into for example a nightstand and offer your hotel guests easy access to all their favorite snacks and beverages.
